## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species:

- I. the specifics of a liquid crystal display panel wherein the first protrusions are formed on the TFT substrate comprises a first embodiment corresponding to Figure 3 (claims 27-32);
- II. the specifics of a liquid crystal display panel wherein the first protrusions are formed on the color filter substrate comprises a second embodiment corresponding to Figure 4 (claims 22 and 34).

The species are independent or distinct because the structure of the display device is different thus result in different fabrication methods.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 21, 23-26, 33 and 35-40 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
